A Media Event Royale

SEO Target Marketing

London, England—Their Royal Highnesses Prince William, Duke of Cambridge and Catherine, Duchess of Cambridge wave on the balcony at Buckingham Palace during the Royal Wedding of Prince William to Catherine Middleton on April 29, 2011. The marriage of the second in line to the British throne was led by the Archbishop of Canterbury and was attended by 1900 guests, including foreign Royal family members and heads of state.

Thousands of well-wishers from around the world flocked to London last month to witness the pageantry of the Royal Wedding. Moreover, millions of television viewers and web surfers also tuned in.

Royal Wedding SEO

According to Yahoo! Advertising Blog, search data for the Duchess of Cambridge (who one day may be Her Majesty the Queen of England) was receiving more searches on Yahoo! than “Barack Obama,” “Donald Trump,” “Victoria Beckham” and “Angelina Jolie.” The Royal Wedding was a ‘Media Event Royale.’ Yahoo! Advertising Blog also reported Buckingham Palace commanded ‘no tweeting’ from Westminster Abbey during the royal ceremony.

Patrick, IT Analyst Global Web QA, began with Johnson & Johnson in a leadership development program. Now a mentor himself, Patrick passes his experience and insights on to others.

Teamwork is part of the culture at Johnson & Johnson, and I have always felt like an important member of my team. The people I work with have helped shape my career, but have also promoted a good balance between my work and home life. I volunteer in the community, take part in formal and on-the-job training opportunities, and attend conferences, all of which enable me to grow both personally and professionally. It’s a good feeling to know that my personal development and interests are supported by my company.”
Washington, D.C. – United We Serve is a nationwide service initiative that helping to meet growing social needs resulting from the economic downturn. With the knowledge that ordinary people can achieve extraordinary things when given the proper tools, the President is asking us to come together to help lay a new foundation for growth. This initiative aims to both expand the impact of existing organizations by engaging new volunteers in their work or encourage volunteers to develop their own "do-it-yourself" projects with organizations such as BDPA.

The President stated that the challenges America faces are unprecedented, and that we must build a new foundation for economic growth in America.

The current Administration has begun this work with dramatic new investments in education, health care, and clean energy, but they cannot accomplish goals alone in Washington. Economic recovery is as much about what we do in our communities as what elected officials are doing locally, statewide, or in Washington — and takes all of us, working together.

Volunteers from our industry are needed to mentor parents, teachers, and tutor students across each of our science, technology, engineering, and math (STEM) disciplines. Visit www.bdpa.org to launch a new chapter, host an event, or support a host BDPA chapter near you.

BDPA, formerly known as Black Data Processing Associates, was founded in 1975 to promote professional growth and technical development for those in or entering information, communications, or technology (ICT) oriented fields of interest and related industries. BDPA Chapters publish quarterly or monthly newsletters. For newsletter or web portal advertising rates, publication schedules, online calendars, and e-newsletters, contact regional or local BDPA offices by visiting www.bdpa.org or by calling 1.800.727.2372 (BDPA). bdpatoday (ISSN 1946-1429) is published by participating Local Chapters of NBDA with their respective chapter Communications Committees, mailed to BDPA members, BDPA corporate sponsors and electronically delivered to BDPA Chapters and Chapter Interest Groups (CIGs) as a benefit of membership. First Class and Periodicals postage paid at Washington, D.C. and additional regional mailing offices. Unless otherwise noted by own copyright, art and graphics © NBDA, © BDPA-DC, © Corbis, © Getty Images, and ©JupiterImages™. Cover graphics, photos and logos: BDPA-DC and bdpatoday. bdpatoday is available for immediate online publishing of ICT industry, chapter news, and community IT events. Forward corporate advertisements, articles, events, or images to: info@bdpatoday.org. Readers also may use BDPA Groupsites to review events. The appearance of industry sponsors and advertisements is neither an endorsement nor a product or service guarantee.
Our doors are open.

Join us as we play a key role in Making Home Affordable. We’re a vital part of President Obama’s initiative to stabilize the housing market. For you, that means exciting challenges and an opportunity to have a real impact on our nation’s economy – and your neighbors’ lives. We’ll provide a solid platform for your career and the tools to assist your professional growth.

careers with impact
Unmanned Autonomous Systems
The Tampa Police Department’s Special Support Division showed up in force to a local school with a para-military SWAT rescue vehicle, bomb unit, water rescue truck and a spectacular exhibition of its K-9 program. Above, Special Operations Officer Jim Cooper, TBD, discusses how robotic devices assist bomb squads.

Largo, MD—PC Magazine defines “über-geek” as an individual with a great amount of computer knowledge (somewhat of a “super geek.”) Related slang terms also may refer to them as expert computer hackers or people who use more technical terms than is necessary to get their points across. There is one in every neighborhood and a least one in every BDPA Chapter—we all know who they are. Don’t plan your school’s next Career Day without them.

The Approach
An unique approach to hacking the local Career Day is, modeled after a very popular book by Jeff Potter, “Cooking for Geeks: Real Science, Great Hacks, and Good Food.” It allows students and über-geeks to explore endless career possibilities in virtually every vertical market of interest. One of Potter’s associates stated the book is not a cookbook per se; it really is more about a mindset, about an approach to the kitchen, a way to hack and go “off-recipe” if one must know how making certain meals really work. Toward this end, how does one marinate a Career Day with information technology’s secret sauce?

See Career Day on page 7

SEO from page cover page
Search engine optimization (SEO) is an improvement process designed specifically to enhance the visibility of websites or web pages in search engines by natural or unpaid search results. The latter also is commonly referred to as either "organic" or "algorithmic."

Search engine marketing (SEM) targets paid listings. The earlier (higher on a web page), and more frequently a

2011 Enrollment Periods

PMP Exam Changes | BDPA IT Institute
Accepting reservations for next enrollment periods

Competitively priced for BDPA Members and BDPA Corporate Sponsors, courses that are scheduled for the Spring and Fall terms are the PMP Exam Prep modules taught by Gregory Brown, PMP. The course has been updated to align with the 4th edition of the PMBOK Guide and awards all *35 PDUs* required to sit for the PMP Certification Exam.

Key Benefits of PMP Certification:

- Career advancement, progression and promotion from sponsoring corporations/employers
- Increased technology business acumen and leadership skills
- Respect and prestige of being "certified"
- Publication opportunities in field
- Leadership, management and project management skill development

Industry Update

The Project Management Professional (PMP) credential examination will be revised this year, based on updates to the professional role of a PMP credential holder recently found by PMI’s Role Delineation Study (RDS).

PMI conducts a role delineation study for the PMP credential every five to seven years to ensure the credential reflects contemporary practice, evolves to meet current needs in the profession, and to comply with the PMP’s credentials accreditation against the ISO 17024 standard.

Exam Changes

Project managers pursuing the credential or preparing for the exam in the upcoming year should be aware that approximately 30 percent of the PMP exam will change.

Specifically, the Professional and Social Responsibility content area (Domain 6) will now be tested in every domain rather than as a separate domain on the examination.

The new examination is scheduled to be released on August 31st, 2011.

This means that the last day to take the current PMP exam is August 30th, 2011.

Candidates who would like to take the current version of the examination are advised to schedule early, prior to our National BDPA Technology Conference if possible, to better ensure that they are able to obtain a test date before the update.

Gregory Brown, PMP, MCSE, MCSA, ITIL

Mr. Brown is a BDPA Member and an adjunct professor with Auburn University. Corporate Sponsors, BDPA Members, Student Members, and small businesses are encouraged to contact the BDPA IT Institute Leadership by phone at 800.727.BDPA (2372) if you have questions or need further assistance on or before August 30th, 2011.

SEO from page 6

site appears in the search results list, the more visitors it will receive from the search engine's users. SEO may target different kinds of search, including image search, local search, video search, news search and search engines that are industry-specific verticals (i.e. health, education, transportation.) This provides a website with “web presence.”

As an Internet marketing strategy, SEO considers how search engines work, what people search for, the actual search terms typed into search engines and which search engines are preferred by their targeted audience.

Optimizing a website involves editing its content and associated code such as hypertext markup language (HTML) and meta data elements to both increase its relevance to specific keywords and to remove barriers to indexing activities of search engines.

Promoting a site to increase the number of backlinks, or inbound links, is another SEO tactic to deploy.

Columbus, OH – TECHie Camp is a full-day, week-long technology experience designed specifically for elementary and middle school students. The goal of TECHie Camp is to engage students in activities that can stimulate a deeper interest in technology; as well as provide opportunities for them to express their imaginations. TECHie Camps are offered at a variety of locations co-located with BDPA Chapters between June 6, 2011 and August 26, 2011.

TECHie Camp curriculum is designed to immerse rising 3rd - 5th and 6th - 8th grade students into a singular topic. Campers engage in age-appropriate, hands-on, interactive activities designed to educate, expose and excite them about technology! TECHie Camp instructors give students the knowledge, tools and confidence to become active designers and creators of technology. Our objective in developing TECHie Camp is to put students in the role of creating and designing with technology—not just using and consuming it. As a result of the TECHie Camp experience students will:

- Increase their understanding and knowledge of how to use technology to expand their own learning;
- Elevate their confidence with STEM-related concepts and skills in a safe and supportive environment;
- Develop valuable 21st century skills such as teamwork, problem-solving and critical thinking;
- Develop positive attitudes and perceptions about the relevance of technology to their educational and professional success;
- Increase their awareness of STEM-related educational and career pathways;
- And, interact with positive role models employed in technology and STEM related occupations.

For 2011, TECHie Camp is offered via partnerships with local colleges and universities, K-12 schools, and nonprofit organizations including participating BDPA Chapters in the following states: Ohio, Pennsylvania, and Texas.

BDPA members and BDPA student members interested in IT careers in New York or Washington D.C. with SiriusXM Satellite Radio are invited to review current openings online.

Washington, D.C. – SIRIUS XM Radio is America’s satellite radio company delivering to subscribers commercial-free music channels, premier sports, news, talk, entertainment, and traffic and weather.

SIRIUS XM Radio is the leader in sports programming as the Official Satellite Radio Partner of the NFL, Major League Baseball®, NASCAR®, NBA, NHL®, and PGA TOUR® and major college sports.

SIRIUS XM Radio has arrangements with every major automaker. SIRIUS XM Radio products are available at shop.sirius.com and shop.xmradio.com, and at retail locations nationwide, including Best Buy, RadioShack, Wal-Mart and independent retailers.

SIRIUS XM Radio also offers SIRIUS Backseat TV, the first ever live in-vehicle rear seat entertainment featuring Nickelodeon, Disney Channel and Cartoon Network; XM NavTraffic® service for GPS navigation systems delivers real-time traffic information, including accidents and road construction, for more than 80 North American markets.

Immediate I.T. opportunities for BDPA members are available online at bdpatoday.org. Members also may update their resumes with NBDDPA at bdpa.org in advance of upcoming career fair and open house announcements.

A BDPA Open House and a Career Day invitation with SiriusXM Satellite Radio for New York and Washington, D.C. areas are tentatively planned for this year.

Technology vs. ‘High-Value’ Targets Hiding in Plain Sight

Special Report

Arlington, VA—The Office of Naval Research (ONR) intends to launch on May 16 a new Internet wargame, recruiting a community of more than 1,000 players to collaborate on solving real-world problems facing the United States Navy.

Scheduled to run for three weeks, the Massive Multiplayer Online Wargame Leveraging the Internet (MMOWGLI) exercise will recruit online players from across the government to suggest ways of combating piracy off the coast of Somalia.

“MMOWGLI is an online game designed to find and collectively grow breakthrough ideas to some of the Navy’s most complex problems—those 21st-century threats that demand new forms of collaboration and truly outlying ideas,” said Dr. Larry Schuette, ONR’s director of Innovation, whose office is managing the project.

The piracy scenario was chosen as a means to demonstrate the platform, but MMOWGLI itself can be applied to any scenario, officials said.

ONR intends to produce varying results from a diverse group of players drawn from the ranks of academia, defense, and government and nongovernment organizations. The plan is for MMOWGLI to identify solutions to difficult challenges by tapping into the intellectual capital of a broader community.

See Endgame on page 14

One of the world’s busiest and most important shipping lanes is the Gulf of Aden linking the Suez Canal and the Red Sea to the Indian Ocean; this vital waterway is crossed by over twenty thousand ships every year and has become the center of the world’s fight against piracy. –The X-Journals

This map shows piracy and armed robbery incidents reported to the IMB Piracy Reporting Centre thus far in 2011. Map courtesy of International Chamber of Commerce.
Office of Naval Research

At the Office of Naval Research (ONR), science springs to life. Our diverse team of scientists, researchers and engineers turn academic principles into actual technologies that give our military the edge against an ever-changing threat.

ONR takes pride in the spirit of innovation and collaboration that fuels our accomplishments, earning accolades along the way for the quality of our work environment:

★ 2007 Best Places to Work (Office of Personnel Management)
★ 2010 Top Supporter of HBCUs

It’s the same spirit that has earned the U.S. Navy honors as one of the nation’s Best Diversity Companies (Diversity/Careers in Engineering and Information Technology Magazine, 2008) and the Work Life Legacy Award from the Families and Work Institute. And it’s also why the U.S. Navy is on par with the top 50 companies to work for in the United States.

“I am committed to ensuring that we, as a Navy, are going to be one of the best places for a young person to start their career. We must all think and work as an organization to attract, recruit and retain our nation’s best and brightest now and in the future.”

-- ADM Gary Roughead, Chief of Naval Operations

Consider a career with the Office of Naval Research. For more information about ONR, visit www.onr.navy.mil
Endgame from page 12

“Technology Helps Bring Down the World’s Most Wanted Terrorists”

“We hope MMOWGLI will help us to understand what happens when your insights are combined with the observations and actions of another player,” Schuette added. “Will that fusion result in a game-changing idea or solution, or will the MMOWGLI platforms teach us something about our traditional thought processes?”

MMOWGLI will also be a template for aiding future users faced with their own complex problems, said Garth Jensen, director of innovation Naval Surface Warfare Center Carderock division, who is leading the project.

“At this stage, however, MMOWGLI is a simply a pilot/demonstration project,” Jensen said. “Therefore, we are exploring whether doing something like MMOWGLI within Navy is feasible, and if so, what we might learn from the experience.”

Palo Alto, Calif.-based Institute for the Future and the Naval Postgraduate School are partnering with ONR on the MMOWGLI project.

The Department of the Navy's Office of Naval Research (ONR) provides the science and technology necessary to maintain the Navy and Marine Corps' technological advantage. Through its affiliates, ONR is a leader in science and technology with engagement in 50 states, 70 countries, 1,035 institutions of higher learning and 914 industry partners. ONR employs approximately 1,400 people, comprising uniformed, civilian and contract personnel, with additional employees at the Naval Research Lab in Washington, D.C.

Related maritime domain awareness technologies for ONR careers or an ONR contractor include: Navy’s SPARTAN Unmanned Surface Vehicles (USVs), Wireless-Over-Water (WOW), and a Floating Area Network (FAN).

“Secured Communications into The Situation Room”

Washington, D.C.—Military experts and analysts have reported to various news outlets that as the raid conducted by SEAL Team 6 closed in on Osama bin Laden, SEAL Team 6 likely rehearsed and successfully executed its mission armed with the best technology available to Warfighters anywhere in the world. In-atmosphere satellites such as drones or unmanned aerial vehicles (UAVs) served as ‘eyes in the sky’. Space-based satellites helped convey real-time information to pilots and other supporting elements. Helmet-mounted cameras, which were reportedly worn during this mission, were used to transmit real-time images to the Commander-in-Chief inside his situation room and to other base commanders. In the behind-the-scenes photo (above) released by the White House shortly before press time, this iconic image shows President Barack Obama and Vice President Joe Biden with members of our national security team monitoring the mission.

Pre-Register by Friday, May 20th, 2011
We only hire one kind of person. The best.

It’s time you knew.

At AFCS, we provide civilian support to the United States Air Force, and, as we see it, there is no greater calling. So when you apply for a job with AFCS, the most important thing we want to know about you is, "Are you great at what you do?" If you are, then consider joining one of the leading STEM teams in the world and work with cutting-edge technology, the likes of which you might never see in the private sector. No matter who you are or where you’re from, if you’re the best, we might have a place for you.

NATIONAL BLACK DATA PROCESSING ASSOCIATES

33rd National Technology Conference and Career Fair

August 3-6, 2011 • Hilton Chicago • Chicago, IL
Federal Data Center Consolidation Initiative (FDCCI)

Washington, D.C.—The Federal CIO Council launched a government-wide Data Center Consolidation Task Force to consolidate and increase efficiencies and to help meet the overall Federal target of a minimum of 800 data center closures by 2015. The Task Force comprises data center program managers, facilities managers, and sustainability officers from 24 agencies that work together to share progress toward individual agency goals. This dataset reflects information provided by the agencies. All questions or inquiries should be directed to the specific agencies. Calendar year 2010 (CY2010) and CY2011 datasets provide lists of planned or closed data centers by agency and by city/state location since the FDCCI started in February 2010.

The Data Center Consolidation Task Force meets monthly to review the progress of each consolidation project and ensure government-wide alignment among agency efforts, where appropriate. As its work evolves, the Task Force will serve as a “community of practice” for agency CIOs and data center program managers to share best practices and enhance consolidation effectiveness.

For additional collateral information and other FAQs, visit: http://www.cio.gov/pages.cfm/page/FDCCI

Orlando, FL—PC World reports Research In Motion (RIM) recently introduced an unexpected guest speaker at BlackBerry World—none other than Microsoft’s CEO Steve Ballmer. Ballmer unveiled the new partnership between RIM and Microsoft which will have Microsoft’s Bing replacing Google as the default search provider on BlackBerry mobile devices. Although industry analysts feel Microsoft stands to gain from the alliance, many find it hard to see the value proposition for RIM. Moreover, Microsoft appears to be tackling explosive mobile markets through a combination of attack vectors with internal solutions for Smartphones such as Windows Phone 7, and leveraging Windows 8 for new tablets. For additional information, visit: www.pcworld.com

Solar Industry Collaborates to Make Better Panels

Washington, D.C.—The U.S. solar industry is banding together to fend off an onslaught of global competition, and to lower the cost of manufacturing solar technology domestically. To make it happen, the newly formed U.S. Photovoltaic Manufacturing Consortium (PVMC) secured a $57.5 million federal grant from the Department of Energy Sunshot Initiative, along with financial commitments totaling $400 million from various state and corporate entities. The following already have ‘skin in the game.’

Element Partners invests exclusively in established high growth companies in the energy and clean technology markets. They specifically focus on companies with innovative solutions to global energy, resource, and environmental problems.
